ACCUSATIONS THAT LED TO THE ARREST OF MRS. APPLEGATE.

Her Children Said to Have Stood in a Row and Put Their Fingers to Their Noses at a Neighbor-One Man Says She Called Him a Whisker-Worn Hinky Dink

DUMONT, N. J., June 14 .- This village passed a quiet Sunday. Nobody was reviled on their way to church; no doors or windows were beaten in with rocks; Squire Christcomb, who speaks seven different languages, didn't have to use any of them in self-defence; Mayor Dickson took his afternoon walk without being told that he was a "whisker-worn hinky-dink," and all the other 800 persons of Dumont spent a peaceful Sabbath.

This was so, people here say, because Mrs. Catherine Applegate, who was locked up in the county jail in Hackensack on Saturday under the accusation of being a common scold, hasn't got out yet. Now that she is out of the town her neighbors are willing to talk about her and to give some of the harrowing details of her Dumont career, from the time she reached here newly wed fifteen years ago to the moment che brought the law down on her head by being a party, as it is alleged, to an act of violence on one of Joseph Campitello's fine spring chickens.

Mrs. Onderdonk, the wife of D. Ajax Onderdonk, who lives two doors away from the Applegate house, says the relations between Mr. and Mrs. Applegate have been strained. Mrs. Applegate, according to this neighbor, has shown signs of jealousy which have increased, until many women in the neighborhood wives, widows and their daughters—stand accused by her of trying to steal her husband.

trying to steal her husband.

This unwarranted jealousy, the neighbors say, has caused her to do all sorts of absurd and disagreeable things and is directly responsible for her being locked up now as a common scold. She was arrested twice before, but the officials at Hackensack wouldn't hold her, and in the words of Mayor Dickson, "she beat the marshal

Mrs. Applegate about two weeks ago, it is said, threw a rock as big as a man's head against Ajax Onderdonk's front door one night when her husband was visiting

Onderdonk has the stone on his parlor mantel now as a souvenir, along with the skin off the legs of the biggest bull frog his eldest boy ever caught. Soon after her attack on the front door, she dubbed Mrs. Onderdonk, according to the state-ment of Mrs. Onderdonk herself, "the ment of Mrs. Onderdonk herself, "the Rip," and persisted in screaming that name at her every time she went up the street. A few nights later she visited the Onderdonk house again looking for her husband, and when she was put out by Ajax, she instructed her three little girls and her little boy to yell "murder" at the top of their voices. They did so and the neighbors came running in from all directions The next day Mr. Onderdonk's ten-year-old daughter was set upon by the Applegate children, the Onderdonks say, and beaten.

She was angry at Mrs. Dickson, a widow who lives next door and accused her along with Campitello's wife and others, of being after her husband. She came to Mrs. Dickson's house frequently, Mrs. Dickson says, and called her an "old Dutch plough woman," and other names.

woman," and other names.

"She is red-haired and she's got a temper as flery as her hair," said Mrs. Dickson, and whenever I could I kept out of her way But if she couldn't get at me herself, she would send her children around and they would stick their fingers up to their noses, all standing in a row. Why, the other night my daughter was sitting on the front stoop with a young man and Mrs. Applegate came in and talked so the children had to

get away from her.

"Only the other day she dressed up a dummy in his best clothes and put it out on the front fence, so that we neighbors might see it. Goodness, mel I'm sure I never spoke to him but three times, and then he was always sideways. I mean he was always sideways. I mean he was always sideways. going along the street and just tipped his TO CITY COLLEGE GRADUATES.

Mrs. Applegate, according to Dumont | Character, Says Dr. Huntington, Tells in reports, kept up a running fire of words and whose back door opens up only a few feet away from Mrs. Applegate's back door. Between the houses is a picket fence, The Applegate children would, on their mother's advice, according to Cam-pitello, get his chickens to stick their heads between the pickets and then pull on their necks until they had stretched them to the limit and the chickens were dead. It was this act which directly inspired Campitello to swear out the warrant for his neigh-bor's arrest. He has one or two chickens with elongated necks, it is said, as eyidence.

Mrs. Applegate explains away the evidence by saying that the chickens' necks were stretched reaching through the fence to pick up food on her side.

Basides reviling her neighbors Mrs. Applegate, the people say, used to scream at the Mayor every time she saw him: "Here he comes, here he comes, the whisker-worn hinky-dink." Persons here say that the woman is

perfectly rational.

"If she comes back," said Mayor Dickson, "something awful is liable to happen and I'm going to do all I can to keep her where she is."

Wrecked Schooner Emerson Towed to New London.

NEW LONDON, Conn., June 14.-The schooner Fred A. Emerson, which sailed from Bangor early this week and was caught in the gale on Friday and capsized near Montauk Point, was found by one of the Scott Towing Company's tugs on Friday night and brought here this afternoon. When the vessel was righted the body of a sailor who was lashed to the shrouds and drowned was taken off the wreck and is now awaiting shipment to relatives in Maine.

Baccalaurente at Lafayette. EASTON, Pa., June 14.-At Lafayette College this morning the Rev. Wallace Radcliffe of the New York Avenue Presbyterian Church, Washington, D. C., preached the baccalauerate sermon. Acting president W. S. Kirkpatrick, after reading a letter to the graduates from President Warfield, who is now in Switzer-

land building up his health, made the bac-calaureate address. The Weather.

Cloudy and showery conditions continued ves terday over the middle Atlantic and New Ing-land States. They were due principally to cooler weather, which was following close behind the ow pressure that had covered these sections The storm area in the Southwest caused rain in Texas. Louisiana. Arkansas. Okiahoma, Kansas. Mississippi, Georgia, Alabama and Florida. The rainy conditions were spreading northeastward. western Lake regions and the Northwest. It was cooler in all the Atlantic States and the extreme Northwest; elsewhere it was warmer.
In this city the day was cloudy, with showers and thunderstorms: wind fresh to brisk south-easterly; average humidity, 91 per cent.; barometer

would mean setting a premium on dieness. There are many qualities that count besides the quality I have named. Mental quickness counts, natural shrewdness counts, a retentive memory counts, physical strength counts, the sheer power of endurance counts, but the thing that counts the most, I say, is

solder. Seek to by this dead by additional and a day by day to the city's treasure house of character.

We have societies for making the city beautiful; we have societies for extending the city's trades. Be it your task to help in making the city what neither art alone nor commerce alone can make it, a city walled with righteousness and shadowed by the

OUR ILL-GOVERNED CITIES.

Bishop Mackay Smith at Lehigh's Bac-

calaurente Laments Civic Corruption.

Dr. Alexander Mackay Smith, Bishop Coadjutor of Pennsylvania, delivered the

baccalaureate sermon at Lehigh University this morning. His theme was "A Time and Times, and the Dividing of Times."

In his sermon he said:

In his sermon he said:

"We are in danger of becoming the pharises of the world. Instead of seeming to hold that we are quite fit to govern other people we ought rather to realize that there is no nation in the world where more awful differences exist between promise and performance than in our land of love and devotion. I think I am not guilty of exaggeration when I say that with the exception of the capital at Washington, there does not exist in this country to-day a

does not exist in this country to-day a single example of a really well-governed large city in the European sense. Every such municipality shows some sort of corruption, and is governed by men of low education and defective morals, whose reverse is unknown to the law and whose

REPORTS FROM MINING CAMPS.

MINES ON THE COMSTOCK LODE TO BE REOPENED NEXT MONTH.

Water Has Been Pumped Out and It Is Expected Paying Ore Will Be Found-Unexpected Rush to the Alaskan Fields Price of Lake Iron Ore Tonnage Cut.

RENO, Neb., June 8 .- By the Fourth of July all the mines on the Comstock lode will be running again for the first time in fifteen years. By that time the lower levels of the Consolidated California and Virginia mine will be unwatered, and it is expected that good paying ore will be found on the lower levels. In nearly all the old mines electric hoists have been put in and the mines are all using electric power, which will greatly lessen the expenses of operating. The most favorable showing is made in Utah, Occilental, Potosi, Chollar and Mexican. It is now fifteen years since a small bonanza was found in Consolidated, California and Vir-ginia which yielded \$6,000,000 and which arried the stock from \$1 to \$50 a share. None of the Comstocks is now quoted over \$2.50, but the finding of good ore in any of the mines mentioned would advance the whole list. G. H. Hamstadt of Manuel is in Los Angeles arranging for the transfer of the Vulcan group of copper mines in the Searchlight district of Nevada. The Vulcan group is thirty-eight miles from Manuel and is directly Dr. S. Parkes Cadman of Brooklyn Preaches on the line of the new Salt Lake railroad. The main shaft is down 600 feet and a heavy ITHACA, N. Y., June 14.-The Rev. S. body of ore carrying 20 per cent. of copper is in sight. This is said to be the richest copper deposit on the Coast. Hamstadt has also bonded four gold claims in this Parkes Cadman, D. D. (Congregationalist). of Brooklyn, N. Y., this afternoon preached the baccalaureate sermon to the 1903 graduvicinity to Los Angeles capitalists. The Winona mine near by is also being inspected ating class of Cornell University. The services were held in Sage Chapel at 4 by Los Angeles capitalists. The ore averages \$15 net per ton. The Golden Traces mine, owned by Boston men, is the largest proposition in the Searchlight district. There o'clock and marked the opening of the week's exercises of the thirty-fifth com-The 520 members of the graduating class, is \$3,000,000 in sight and on the dumps, and the ore averages \$20 to the ton. The ore is carried fourteen miles to the Colorado River all gowned in black and wearing the conventional mortarboard cap, filed into the chapel and took the space reserved for them, after the rest of the edifice had long been filled to overflowing with visiting alumni and parents and friends of the graduating springs. on the company's narrow gauge road. The whole Searchlight district is booming, as the ore assays well and mining expenses are

filled to overflowing with visiting alumniand parents and friends of the graduating seniors.

Dr. Cadman took for his text: "In all thy ways acknowledge Him, and He shall direct thy path."—Proverbs iii., 6. A good part of his address dealt with the relation of science to religion. He said that science had lifted up a great acknowledgement to religion in modern times. "There have been errors in the teachings of theology," he said, "the same as there have been errors in philosophy and science; but to-day both science and philosophy have joined with theology in the teachings of religion."

Speaking directly to the members of the graduating class, who arose to receive his final remarks, Dr. Cadman said:

"If we knew nothing of God except that He was, that would not be worth the knowing. Life shall be life forever, else the earth is darkness at the core. God in man is life. The mind of man cannot exist apart from nor neglect the supreme mind of God. The personality of Christ is the only gateway through which God flows into man. God did not make man a mere automaton. He gave him besides character. The man, therefore, who robs himself of his character, robs God of the fruits of his labor." From Topopah the reports show that development work is being carried on actively in all the mines. Several strikes are said to have taken place in the Gold Mountain district. The Montana-Tonopah is working on a large body of high-grade ore, and it will soon be in a condition to pay dividends. The strikes in Belmont and Midway also show that those two mines are in good mineral territory. trouble with Tonopah now is the high price for water and fuel and the great expense of shipping ore to smelters. When water is cheap and electric power can be used thousands of tons of ore that assays less than \$100 to the ton will be milled. This ore is now sacked up in great stacks some of which represent more than half a million dollars.

ALASKA. SEATTLE, Wash., June 8.-The most surprised people in the Pacific Northwest at the present time are those who are engaged

from Dawson.

No. 9, on Fildorado, changed hands last week. From an open cut on this property last year \$40,000 in dust was taken, and it is thought it will pay equally well this year. There is ground enough to pay for many on Gold Run there is considerable activity 8 washing out \$4,000 in a single day's while No. 40 took out 800 ounces in three a. There are fifty large dumps on this No. 8 washing out sales a counces in three days. There are fifty large dumps on this creek.

Many who joined in the Tanana stampede from Forty-Mile are returning somewhat disappointed, but are making up for lost time in good clean-ups of dumps on Lost Chicken, Jack Wade and other good creeks.

counts, the sheer power of endurance counts; but the thing that counts the most, I say, is character.

You may be sceptical upon this point, but wait and see, or better than waiting to see, ask some old man who has had long experience of life and whose word you trust. He will tell you that although he has observed splendid beginnings not a few, and has watched the start in life of scores of brilliant young men, the only ones who have held out have been those who have commanded not merely the admiration, but the confidence of their fellow men.

Of you who have been in a special sense under her watch and ward the city of New York expects the best things. Be proud of your college, but especially be proud of it because it is the College of the City of New York. To this great municipality you owe the sort of debt every West Pointer owes the country which has trained him to be a soldier. Seek to pay this debt by adding day by day to the city's treasure house of character.

We have societies for making the city in good clean-ups of dumps on Lost Chicken, Jack Wade and other good creeks.

MONTANA.

BUTTE, June 14.—The Emma mine, in the Butte district, which has been closed for several weeks, is to be opened again, as the stockholders in New York and Boston have furnished enough money to carry on underground work and to build a smelter for the treatment of the vast amount of zine ore that has been taken from the mine. The ore runs 25 to 39 per cent. zine and 290 a ton in silver, gold and lead. It is proposed that while the zine and silver ore is being mined from the upper levels, the work of sinking and developing for copper will continue. The intention is to sink the shaft to a depth of 1,200 feet. If a smelter can be built that will successfully handle the Emma ore and make a profit out of the zine in addition to the gold, silver and lead profits, it will be a great thing for the Emma property and for the large number of mines in Butte which have vast quantities of the same kind of ore only waiting for a correct method of treatment.

The Travonia mine in the southwestern part of town, one of Senator Clark's proper ties, has suspended operations and the machinery is now being taken from it. It was at one time one of the richest silver-gold producers in the district and was the first mine to attract mining interests to Butte. Working on the belief that greater depth would increase the value of the ore, Mr. Clark had the working thoroughly explored during the past several months, but with no success.

ing the past several months, but with no success.

The Snowshoe mine in the Libby district has resumed operations after a winter of enforced idleness. Almost the entire year was spont in sinking a snaft from the lowest tunnel. It is estimated that this shaft has opened up enough ore to keep the present mill running for at least five years without sinking further. The Snowshoe is one of the big properties of the State and has produced \$700,000 worth of ore. The values are in gold, silver and lead. It is reported that as much as \$2 is found in the crude ore in the lower levels.

single example of a really well-governed large city in the European sense. Every such municipality shows some sort of corruption, and is governed by men of low education and defective morals, whose power is unknown to the law and whose code of action seems to be that of simple savagery."

FIFTY YEARS IN THE FACULTY.

City College Alumni to Celebrate With Acting President Compton.

Five hundred members of the Associated Alumni of the College of the City of New York will give a dinner to-night to the acting president of the college, Alfred G. Compton, at the Arion Society's rooms. The dinner will commemorate his fifty years of service in the college faculty, which he entered in 1853, directly from the first class graduated there. He became professor of applied mathematics in 1869, and last Decomber was selected to act as president until the inauguration on Oct. I of this year of John H. Finley as head of

Eighteenth Street, Mineteenth Street, Sixth Avenue, New York.

Wickes district, twenty miles south of Helena. Two of these claims will be developed by 572-foot shafts, for the purpose of determining the exact strata. McCabe believes, though, after going through the iron cap which exists on the surface, and attaining a depth of from 300 to 500 feet, large copper bodies will be found. on the surface, and attaining a uepti of Homeson 500 feet, large copper bodies will be found.

The Monitor-Richmond Company, which owns valuable copper deposits near Saltese, the recently discovered mineral district in Missoula county, is preparing to eject a \$250,-000 smelter for the treatment of its ores, instead of shipping to Butte. The permanency of the ore bodies has been assured, it is said. The ore runs all the way from 5 to 35 per cent, in the red metal.

A seven-foot vein with a pay streak of gold ore running as high as \$480 a ton has been encountered in the claim of the Big Four Company, operating near Ferguson, Jefferson county. Upon this showing the company has decided to sink a shaft 150 feet.

The Seattle and Boston Mining Company, which is behind the Montana Reduction Company and the Basin and Elliston Railroad Company, has secured a right of way for its tracks through the town of Basin, and construction work will now begin. This road will connect a dozen or more mining districts which have been kept out of the dividend list by the lack of transportation facilities. The parent company has taken over several of the most promising mines and made conwhich have been kept out of the dividend list by the lack of transportation facilities. The parent company has taken over several of the most promising mines and made contracts for the product of others.

The New York syndicate which recently bonded the Copper State and Red Metal claims belonging to Frazier & Quinn of Stone, Granite county, is satisfied with the showing made and will take up the bond and develop the properties on an extensive scale. A lead has already been cut which shows from 17 to 19 per cent. copper. The amount of the bond was not made public, but the cash payment made is understood to have been a substantial one.

The Montana Mining Company, limited (Rothschilds of London), has bonded for \$40,000 the Barton & Jones group of mines at the head of Warm Springs Creek, in Granite county. The lead is thirty-four feet wide, with free milling ore averaging \$7 at ton. Fifty feet from the main shaft of the Barton & Jones group is a parallel vein two feet wide, the ore assaying \$80 a ton in gold.

CALIFORNIA.

CALIFORNIA.

the ore assaying \$80 a ton in gold.

CALIFORNIA.

SAN FRANCISCO, June 8.—Eighty carloads of heavy machinery have arrived at Keswick, Shasta county, for the Northern California Power Company. This company will furnish the Balaklala and other big mines with electric power, the Balaklala alone taking 20,000 voits.

In the Arondo mines in Southern Inyo county six feet of good ore has been struck at the bottom of the 250 foot shaft. The ore body is three feet wide and is widening as the shaft goes down. Ore from 100 tons averages \$40 a ton.

The Cecil Rhodes Gold Mining Company at Panamint, on the edge of Death Valley, recently milled eighty tons of ore that averages \$175 a ton. Much activity is reported all through Death Valley.

Fresno Guich is now one of the best producing camps in Shasta county. The Brown Bear, leased by Brown Bros. cleaned up \$30,000 last year and the lessees have just received \$21,000 from 108 tons of ore. This, with \$10,000 cleaned up last fall, will make the year a good one

A rich strike was made last week in the West Point and Exchange Consolidated mines at Monte Cristo, Nevada county. The front ground had been worked out in early days and proved enormously rich. A tunnel was begun last August and was driven into the hill for 1,000 feet, and on Tuesday last pay gravel was struck. The blue gravel is about six feet thick on bedrock, and above this is a layer of lava gravel which prospects well. From a carload of blue gravel three pans worked out \$12 in coarse gold.

The first sixty days run of hydraulicking in the Big Butte Mine, near Chico, showed such large returns that a dividend will be declared. The company has worked the mine for two years, and has spent a large sum. The gravel channel in this mine is from 300 to 500 feet wide and a mile in length, and in many places it is 25 feet deep. The returns are so far above expectations that the company will double its present hydraulic plant.

LAKE REGION IBON MINES.

LAKE REGION IRON MINES.

DULUTH, Minn., June 11.—Since February, 1902, the Cleveland Cliffs Iron Company has been sinking a shaft at its now famous Mass property at Negounee. This shaft has presented obstacles heretofore unknown to mine managers, and it has now reached ledge, 160 feet down, and is being securely bottomed.

MINING PUMPS.

tickets at 355 and 1234 broadway and tourist offices.

The work of sinking through ledge to the ore body will begin, and as the distance is still 600 feet this will take a year or so more. This deposit of ore was found two years ago by drill operations, and it is known that a large mine will result there, in all probability one of the best in the Negaunee area. The mine, when opened, will represent an investment of more than \$1,000,000.

The United States Steel Corporation has purchased the lease of the Cascade mine, Mesaba range, paying \$125,000. The fee owner will get about \$1,000,000 more in royal-ties.

ties.

The best opinion is that the shipments of iron ore for the year to American furnaces will not equal those of 1992. This is largely due to the fact that more ore was sent fordue to the fact that more ore was sent forward then than was required in the attempt to get supplies ahead at the low prices then prevailing, and that now, prices being higher, no such effort will be made.

The United States Steel Corporation has succeeded in forcing the price of Lake tonnage down five cents to 80 cents a gross ton. Duluth to Ohio ports. There is too much steamship tonnage on the Lakes for the business of the year. But at 80 cents a modern, well-equipped vessel, handled quickly at docks and run economically, can make a good profit, and more contracts are being closed by shipbuilders to build vessels for men who have spent their lives in Lake trade. One large contract was closed this week and others are now pending. These builders must see a future for good tonnage with better return than 5 and 6 per cent, on their investments.

Boisk. June 7.—The trail from this place by way of Pen Basin to Thunder Mountain is nearly free of snow and many prospectors and mine owners will return to that district within the next two or three weeks. During the winter considerable development work was done on many of the mines and they turned out much better than was expected. It is reported here that the old Elmore mine at Rocky Bar has beensold to the Standard Oil Company and that at least \$50,000 will be spent in pumping out and thoroughly developing the property.

Another important strike has been made in Neal district. A vein three feet thick has been opened which carries values running from \$20 to \$150 to the ton. It is in the Centre Star, not far from the Daisy. IDAHO.

UTAW.

SALT LAKE, June 8.—The conveyance of the Highland Boy mines at Bingham, its smelter in Salt Lake valley and the entire holdings and rights of the Utah Consolidated Gold Mines Company of England to the Utah Consolidated Mining Company of New Jersey has been accomplished. With the Highland Boy mines and smelter again the property of an American company, its plant to be enlarged and its earnings to enrich American investors, the enterprise, so prosperous from its inception, begins an ers rich with assurance of even greater achievements than the past has afforded.

The Utah Apex Company, with properties at Bingham, has incorporated for \$7,500,000.

The floyal Mining Company has added the sum of \$150,000 purchases to its southern holdings, having recently acoultred the Burning Moscow and the Wild Bill mines out of Milford; the record of these mines is "A No.

BRITISH COLUMBIA.

SEATTLE, Wash., June 8.—The Boscowitz interest in the Britannia mine, Howe Sound, was purchased last week by Butte and Sait Lake investors who held the controlling interest. Several adjoining copper properties owned by Los Angeles capital were sold on Saturday to London prople at \$100,000.

The old Quesnelle and Cariboo districts are abundantly supplied with water this senson, and the mines are in position to yield better than at any time since gold was taken out by the ton.

The Mother Lode mine in Greenwood has resumed shipments and is in condition to keep them up all season. Greenwood camp is in flourishing condition, with plenty of ore.

WASHINGTON.

wide, assaying from \$15 to \$200 in copper and gold. There is a large amount of ore on the dumps and it is accumulating rapidly. The deep snows in the Cascade range are melting rapidly, making it possible for miners and prospectors to get into the mines. There will be a large amount of development on the eastern and western slopes of the range, embracing Skykomish, Index. Goat Creek. State, Methow, Cle-Elaim, Swank, Gold Creek and Cascade.

In the Security mine, Okanogan district, a strike of two feet of gold ore is reported that assays from \$20 to \$500 a ton.

COLORADO.

COLORADO SPRINGS, June 10.—Progress at the rate of twonty feet daily is being made in the El Paso general drainage tunnel. At this rate the objective point, the Elkton shaft, will be reached Aug. 25. The water in the Elkton mine is \$21\frac{1}{2}\$ feet below the seventh level. A weekly measurement shows that whenever the other mines of the district pump to lower their water level the Elkton water level also lowers. This is proof that the tunnel taps the main watercourse and will drain a large area, making deen mining possible. The average level, now 350 feet, will be lowered to 600, according to expert opinion.

possible. The average level, now 350 feet, will be lowered to 650, according to expert eninion.

The Golden Cycle mine is producing 130 tens of ore daily, or from 4,000 to 4,500 tons mont ly. A crossout is being run southwest from the shaft to open up 1,000 feet of new ground. Drifting already extends 400 feet. The formation is a volcanic ash. Another crossout is being run from the 900-foot level to cut the Revenue Cutter vein, 870 feet east or te Legal Tender. The opening of this vein at that depth is awaited with interest.

John Hays Hammond of New York, consulting engineer for the Guggenheim Exploration Company, returned unexpectedly from the Guanajuato mining district, Mexico, last week because of a slight illness. In speaking of the Guggenheima investment he says they will enter actively into Colorado, Utah and perhaps other Rocky Mountain mining fields. They will also acquire interests in Mexico.

The various mills and smelters of the Cripple Creek district are busy. If the record since June 1 is kept up, the month's product will exceed \$2,000,000, the gross value of \$2,000 tons of ore of all grades.

French Sporting Editor's Machine Too Fast. Julien Teza, sporting editor of La Auto of Paris, was arrested on Saturday night. charged with running a motor cycle too fast at 110th street and Riverside Drive. Texa, who is living at 24 West Twenty-fifth street, was arraigned vesterday in the West Side SUMMER RESORTS
